Multi-Conveyor Engineers an Incredible, Economical Solution

Learn how we saved both floor space and money!

Multi-Conveyor recently provided a multiple lane table top conveyor system incorporating a 4 to 1 merge for cartons. Although the packaged snack food manufacturer originally requested three 2:1 combiners, Multi-Conveyor offered an economical 4:1 solution which saved the client both floor space and money.

The system incorporates four lanes of pneumatically actuated clamping devices and blade stops that are used to control the traffic of four rows of product and merge them seamlessly down to one lane for delivery to a palletizing system.

The clamps and blade stops operate automatically by sensing product back-up in each lane while in production mode, or, they can be closed prior to product arrival when a predetermined stoppage in the line is necessary.

Electronic sensors are used to determine back-up conditions, detect product presence at the devices, notify when devices are clear for actuation. The sensor feedback dictates sequenced product release and line conditions.

The entire solution integrated table style top and modular plastic belt conveyors, five (5) single-lane incline and two (2)double-lane decline spiral... (read full article here - you'll be glad you did!)

Have you seen Multi-Conveyor in the new Packaging Guide?

Packaging Strategies, Food & Beverage Packaging and Flexible Packaging have joined forces to recently introduce The Packaging Guide which features some of the industry's leading manufacturers in a new online directory.

Catering to food, beverage, flexible, pharmaceutical and household product packaging, Multi-Conveyor believes that this portal will grow to become a premier resource for the packaging industry and are happy to be a part of this inaugural program.

Thanks for stopping!

Multi-Conveyor sends a special thank you to all of the people that visited our booth at the recent Wisconsin Cheese Industry Conference.
